(54) REGISTERED INFORMATION UPDATING DEVICE

(57)Abstract:

PURPOSE: To allow other station to surely update a registered number by allowing a registration information updating device of its own station side to update caller identification information and sending the identification information before and after updating to a registered revision notice destination.

CONSTITUTION: An update registering means 13 of a registration information updating device at its own station side for update registration updates identification information registered in a sender table 11 by a command from the operator to inform a notice means 14 of that the identification information is updated. The notice means 14 receiving a revision notice fetches the identification information before and after updating and accesses a revision notice destination table 12. Then all stations registered in the table 12 are sequentially (or in multiple address communication) dialed and the revised information of its own station is sent to a line.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
